RECEIVED E-Mail

OCT 03 2013

Div. of Oil, Gas &amp; Mining

John and Jerry,

attached are a letter sent by the Division to Freemont Corporation for the TJ Clark Mine S/015/0076  
lease ML 43260

DOGM's records show that SITLA is holding a \$5,000.00 bond reclamation bond. I am having Penny check the records.

Our records indicate that the lease has expired and the Permittee has not paid permit fees.

What does SITLA want to do?

Penny has tried to track down the bond. Please check your records to see what documentation you have for the bond. From email there was a transfer of bonds from SITLA to the Division a few years ago but our records do not show that we got the bond.

Wayne

Wayne:

A comment on our business system indicates SITLA held a \$5,000.00 CD on this lease. However, another comment entered by Will Stokes on 02/13/2012 indicates Mr. Clark cashed in the CD without SITLA co-sign.

This lease was cancelled 03/16/2007. I will look for the lease file and try to get more information.
